### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3 and 7-14, drawn to a sewing thread, classified in class 57.
  - II. Claims 19 and 20, drawn to a sewing thread, classified in class 57.
  - III. Claims 15-18, drawn to a process of making a sewing thread, classified in class 57, subclass 75.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process of Group III could have a different TPI, and the yarn of which has a finish applied to it. Likewise, Groups I and II are different from one another because Group I does not require ring spinning, and Group II has specific tex and does not address TPI relationship of the overall yarn; just the spun yarn.

3. Because these inventions are distinct for the reasons given above and the search required for each of Groups I-III is not required for the remainder of Groups I-III, restriction for examination purposes as indicated is proper.
